About LEED AP Building Design & Construction Course

This single-day intensive course provides an in-depth approach to the LEED Version 3 Rating System specific to Green Building Design and Construction and is designed to assist individuals in their preparation for GBCI's LEED AP credentialing exam.

The program focuses on the essential concepts, technical requirements, design standards, case studies/lessons learned, and a variety of other tools necessary for sustainable construction to comply with the LEED Green Building Rating System.

Course Outline

The course is divided into nine comprehensive sections relative to the LEED AP Building Design and Construction Exam:

- Review of the LEED Building Design & Construction Rating System
- Sustainable Sites
- Water Efficiency
- Energy & Atmosphere
- Materials & Resources
- Indoor Environmental Quality
- Innovation in Design
- Regional Priority
- LEED AP Exam Tips

Class Includes:

- Access to four online practice exams (unlimited use for 60 days)
- Access to LEED experts for follow-up questions
- Online forum
