

HAMILTON HAD A (PART OF) BRIDGE TO SELL AND OTHER STORIES FROM THE BIG GUYS

An Education in Estimation and Project Management

SPEAKERS:

- **Joe Hampton**, Oregon Operations Manager, Hamilton Construction
- **Randy Burg**, Senior Estimator, Hamilton Construction

It's been said that if you can get it right on a bridge or tunnel, you can get it right on anything!

Hamilton Construction experts will walk us through their process to bid and manage a complicated repair on the Interstate Bridge between Vancouver, Wash. and Portland, Ore. Due to the type of work involved, and their past experience, they ended up being the sole bidder on the I-5 Columbia River Bridge Trunnion Repair Project.

Learn how much must be taken into consideration and pick up some tips for making sure you have everything included in a bid. You can also learn what you need to consider when managing a complicated project such as this one.

Joe and Randy will have pictures to share, and will talk about the scope, attention to safety, large equipment, etc. they needed to complete this project.
