

SPOTLIGHT SERIES

Featuring:

ANDERSEN CONSTRUCTION COMPANY, LLC

For our September Specialty Contractors Council meeting, we are going to hear from a project team from Andersen Construction about the importance of company culture in their approach to building relationships and buildings. Andersen's senior project executive, two senior project managers, and the senior estimator from the \$52 million Oregon State University Gladys Valley Marine Studies Building will share what it took to plan and build the earthquake- and tsunami-proof building in Newport, Oregon. We'll learn how they figured out the earthquake engineering, special provisions for the pricing of it, and the risk they had to take. We will also learn about how to successfully do business with Andersen.

SPEAKERS:

- **Brad Nile**, Project Executive
- **Kris Anderson**, Senior Project Manager
- **Mark Reusser**, Senior Superintendent
- **Chris Reetz**, Senior Medical Estimator
